Giorgi Oragvelidze

Web Developer

Motivated beginner web developer with strong desire to evolve into a proficient full-stack developer.

I am passionate about creating user-centric web experiences that merge functionality with aesthetic appeal. My journey in the world of web development may not have begun long ago, but with my determination I will achieve remarkable things.

I am a quick learner, team player with a can-do attitude and independent initiative, creative and analytical thinking.

Looking for an opportunity to grow my development skills in an innovative environment.
